Declaration of Fair-Rite Product Corp.'s Non-Use of Halogen Materials in Soft Ferrite Ceramic Materials

The soft ferrite *ceramic* material components that Fair-Rite Products Corp. supply do not contain Halogen materials in their composition or make-up.

However, Fair-Rite Products Corp. supplies a product line of assembly cores known as *Snap-its*. This line of products uses polypropylene case components that are RoHS 6/6 compliant and have a UL94-V0 Flammability Rating. One qualification is that these polypropylene case components do contain Bromine at an amount of 1.3 wt% and Chlorine at an amount of 6.1 wt% thereby making these products Halogen containing. This is the only product line that uses a Halogen containing material.
