

ETD Cores (9595444502)

Part Number: 9595444502

95 ETD CORE SET

ETD cores have been designed to make optimum use of a given volume of ferrite material for maximum throughput power, specifically for forward converter transformers. The structure, which includes a round center post, approaches a nearly uniform cross-sectional area throughout the core and provides a winding area that minimizes winding losses. ETD cores are used mainly in switched-mode power supplies and permit off-line designs where IEC and VDE isolation requirements must be met.

 \Box ETD cores can be supplied with the center post gapped to a mechanical dimension or an A_Lvalue.

 $\begin{array}{l} \textbf{Chart Legend} \\ \Sigma l/A : Core Constant, \quad l_{e}: Effective Path Length, \quad A_{e}: Effective Cross-Sectional Area, \quad V_{e}: \\ Effective Core Volume \\ A_{L}: Inductance Factor \end{array}$

Explanation of Part Numbers: Digits 1 & 2 = product class and 3 & 4 = material grade.

Electrical PropertiesAL(nH)5100 ±25%

Electrical	Properties	
Ae(cm ²)	1.73	
$\Sigma l/A(cm^{-1})$	6	
l _e (cm)	10.35	
$V_e(cm^3)$	17.94	
$A_{min}(cm^2)$	1.717	

$A_{\!\scriptscriptstyle L}$ value is measured at 1 kHz, B < 10 gauss
